NO FURTHER ACTION REQUIRED, OFF-SITE NORTHWEST DRAINAGE AREA,
RIVERSIDE AGRICULTURAL PARK, CREST AVENUE AND JURUPA AVENUE,
RIVERSIDE, CALIFORNIA

Dear Mr. Filadelfia:

The Department of Toxics Substances Control (DTSC) has determined that no further action will be required for the Off-Site Northwest Drainage Area, Riverside Agricultural Park for the off-site investigation portion of the Riverside Agricultural Park located at Crest Avenue and Jurupa Avenue in Riverside, California.

The 17,140 square feet or approximately 0.39 acre area includes a portion of the Santa Ana River Trail and Parkway Trail, which passes through 14 incorporated cities in three counties. The focus area is located south of the Santa Ana River Trail, approximately 1700 feet northeast along the bike trail from the public access point at the intersection of Jurupa Avenue and Tyler Street, which is adjacent to the northwest area of the neighboring Riverside Agricultural Park site, located at 7020 Crest Avenue, Riverside, California. The off-site northwest drainage area is owned by the State of California Department of Fish & Game and Wildlife Conservation Board and is within the Riverside County Regional Park & Open-Space District. The purpose of the investigation and risk evaluation was to address how the Riverside Agricultural Park (where a DTSC cleanup for polychlorinated biphenyls (PCB's) was completed in April 2014) may have impacted the off-site area.

Several studies were completed, including:

1. AMEC Geomatrix, Data Evaluation of PCBs and Dioxins/Furans dated June 10, 2010.

2. AMEC, Preliminary Ecological Risk Assessment Problem Formulation dated July 18, 2011.
3. AMEC, Addendum to June 10, 2010 Data Evaluation Letter - Potential Human Health Risks in the Off-Site Northwest Drainage Area, dated August 21, 2012.
4. AMEC, Work Plan Update for Off-Site Groundwater and Santa Ana River Sediment Sampling and Analysis, Letter dated March 25, 2013.
5. AMEC, Data Transmittal - Off-Site and Northern Site Groundwater Sampling and Santa Ana River Stream Bed Sediment Sampling and Analysis Letter dated June 24, 2013.
6. AMEC, Work Plan for Confirmation Soil Sampling and Biological Survey, Off-Site Northwest Drainage Area, Riverside Agricultural Park Letter dated February 18, 2014.
7. AMEC, Data Transmittal - Confirmation Soil Sampling and Biological Survey, Off-Site Northwest Drainage Area, Riverside Agricultural Park dated March 28, 2014.

Based on DTSC's evaluation of the data, it was determined that there were no significant impacts to human health, ecological receptors or the environment. Given the terrain of the area, and based on ownership and designation of the area for open space, additional land uses are not considered viable and a deed restriction precluding such land uses is not necessary. Further investigation or a cleanup action is not necessary, and no further action is required. The Voluntary Cleanup Agreement which was executed on April 22nd 2005 and amended on May 12, 2006, will be terminated upon the resolution of outstanding invoices.

If you have any questions or comments, please contact me at (714) 484-5489, or by email at Maryam.Tasnif-abbasi@dtsc.ca.gov.
